

Simmons Services offer unique programmed painting and maintenance services to suit your needs and control costs.

Traditional one off repaints can often prove to be expensive in high traffic areas, they look good for a limited period of time but soon deteriorate and become grubby in appearance, this leads to these areas being touched up or ultimately completely repainted again quite quickly, which can stretch budgets. With our Painting Programmes you eliminate this, an initial high quality redecoration restores the appearance of these areas, this is then backed up with our annual servicing of these areas, to ensure the areas stay looking their best throughout the term of the agreement. Your assets remain in good decorative order at all times as they are maintained annually with fixed payments and you are free to concentrate on your core operations with the piece of mind that your buildings or structures meet your strategic objectives.

The programme team at Simmons services have the track record and experience to make these programmes work for you, email us at customerservices@simmonsservices.co.uk for an appointment to discuss your requirements or visit our branch locations for local contact details.
